SACHIN KUMAR

Full Stack Developer | Data Analyst

+91 7549171480 | sachincseiot@gmail.com | Patna, Bihar, India | Portfolio | LinkedIn | GitHub | LeetCode

PROFILE

B.Tech Computer Science student and Full Stack Developer with hands-on experience in building web applications, AI-powered solutions, and data-driven projects. Experienced through multiple internships in full-stack development, AI, and data analytics.

PROFESSIONAL EXPERIENCE

Artificial Intelligence & Generative AI Intern — YBI Foundation **Apr 2026 – May 2026**

- Worked on AI and Generative AI concepts through practical projects.
- Applied Python and machine learning techniques to develop AI-based solutions.

Full Stack Web Development Intern — Edulogy Institute **Mar 2026 – Apr 2026**

- Developed responsive web applications using HTML, CSS, JavaScript, and React.
- Worked with MERN stack technologies and implemented full-stack development concepts.

Data Analyst Intern — NoviTech R&D Pvt. Ltd. **Dec 2025 – Feb 2026**

- Cleaned and analyzed data using Excel, SQL, and Power BI.
- Built dashboards and visualizations to generate business insights.

Web Design Specialist Intern — Polytropic Services Pvt. Ltd **Jun 2025 – July 2025**

- Cleaned and analyzed data using Excel, SQL, and Power BI.
- Built dashboards and visualizations to generate business insights.

PROJECTS

Siva AI — AI-Powered Assistant | GitHub **Sep 2026 – Present**

- Developed an AI-powered conversational assistant integrating React, FastAPI, Gemini API, and MongoDB for intelligent chat and data management.
- Implemented real-time response streaming, conversation storage, and responsive chat.

ByteBazaar - Full-Stack E-Commerce Platform | GitHub **April 2026**

- Developed a responsive e-commerce application using React, Node.js, Express.js, and PostgreSQL, featuring dynamic theming and admin-controlled product management.
- Implemented JWT-based admin authentication, RESTful APIs, and API protection using Arcjet, with PostgreSQL database integration and Render deployment.

Cancer Prediction System | GitHub **May 2026**

- Developed a machine learning system to predict whether a tumor is benign or malignant.
- Used Python and machine learning techniques for data preprocessing and prediction.

IPL Analysis Dashboard | GitHub **Feb 2026**

- Built an interactive Power BI dashboard to analyze IPL data from 2008–2025.
- Created visualizations to identify team and player performance trends.

EDUCATION

Bakhtiyarpur College of Engineering, Patna | CGPA : 8.41 **2024 - 2027**

- Bachelor of Technology (B.Tech) — CSE(IOT)

Ganga Memorial College of Polytechnic, Nalanda | CGPA : 8.4 **2021 – 2024**

- Diploma in Electronics Engineering (ECE)

S U V Sarvoday Nagar, Banka | Percentage : 84% **2016 – 2021**

- Secondary School (10th)

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL
- **Frontend:** HTML5, CSS3, React.js, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** PostgreSQL, MongoDB
- **Data Analytics:** Excel, Power BI, Pandas, NumPy
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Vite

CERTIFICATIONS

- Introduction to Graph Algorithm | Deloitte Data Analytics Job Simulation | Data Analytics Training | Introduction to Operating Systems | Linux Training | IoT & Digital Transformation
